

## INSTALLATION:

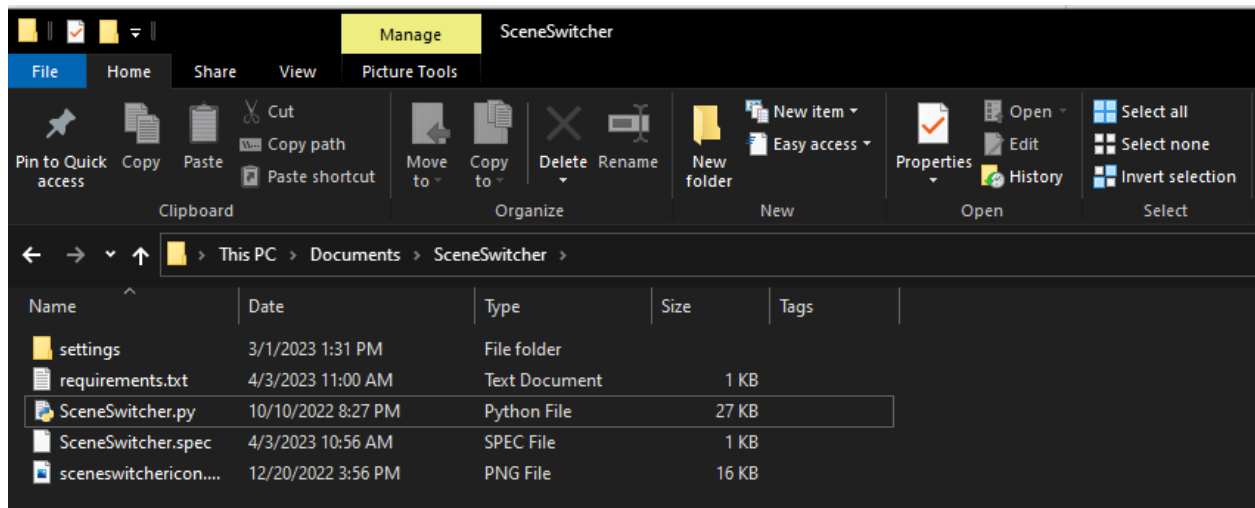

### Step 1:

Search “python” and install the latest version of python from the microsoft store.

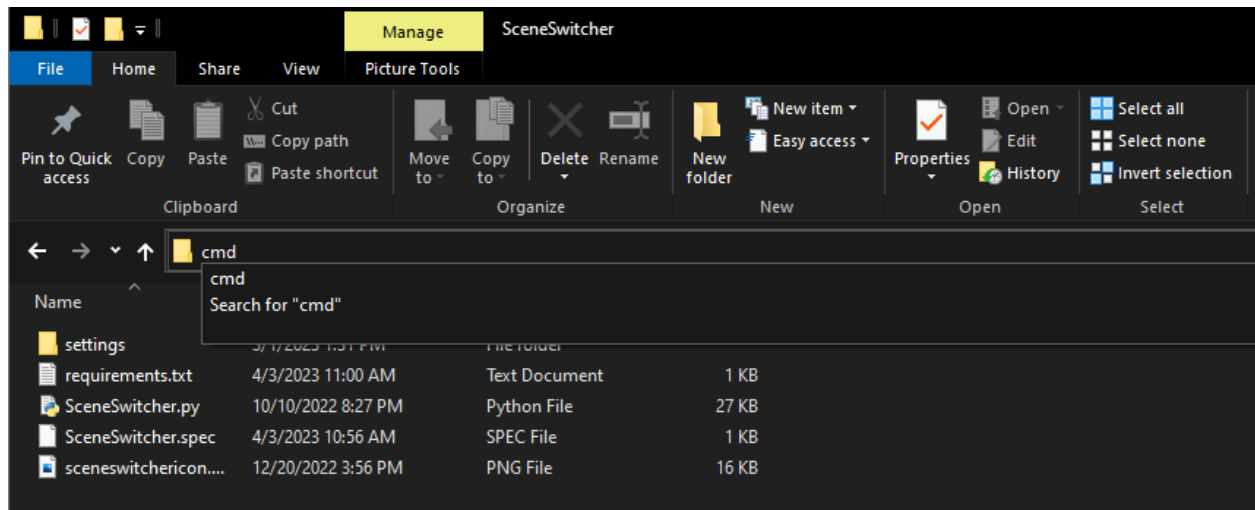

## Step 2:

Open the file directory where the application is installed.

## Step 3:

Click inside the address bar, and type the following command "cmd" and press [ENTER].

A command prompt window with the correct directory open.

## Step 4:

Inside the command prompt type the following command "pip install -r requirements.txt"

```
pip install -r requirements.txt
```

This will install the required packages for the scene switcher.

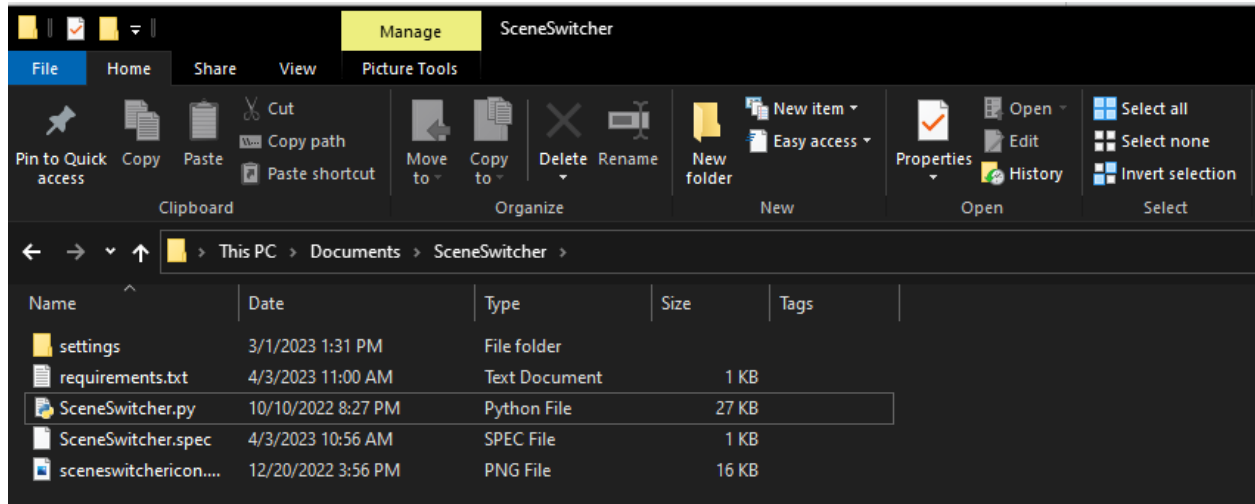

**INSTALLATION COMPLETE... Only need to execute these steps once.**
